# ABOUT ASSOCIATION

## Association Profile

NIX.CZ, z.s.p.o. (Professional Association of Legal Entities) is a company associating Czech and foreign Internet related businesses in order to mutually interconnect their networks (peering). The association was founded in 1996. The infrastructure of the

Association is accessible from four Prague locations.

In 2008 the Association was globally one of the fastest growing IXP (Internet Exchange Point), the largest IXP in the Czech Republic and it ranked among the 10 largest IXPs in Europe. Consistent planning, sophisticated technical solution and 24/7/365 technical support ensure failure-free operation of the Exchange. The Association has been supporting peering via the IPv6 protocol as early as from 2003.

NIX.CZ is a dynamic and open company which actively contributes to Internet development. The development of the Association itself is largely based on cooperation both within the Association as such, and with other IXPs. General Meetings as well as various social events and working groups enable Association members and customers to meet not as competitors but as partners cooperating on the future progress of their IXP. These events are largely attended by interesting foreign guests giving presentations which enable members of the Association to receive up-to-date information on the current situation of other IXPs in the world.

## Historical Development of the Association

The Association was founded by eight companies on the day of 1st October 1996. The main reason for establishing the Association was an effort to simplify the system of interconnecting individual Internet networks and to reduce the costs of such connections.

The functionality of this system is evidenced by the constantly growing number of members. As of 31.12.2008 the Association consists of as many as 68 members and provides services to 24 customers. Increasing popularity and accessibility of Internet networks have brought about an increase in the volume of data traffic and greater demands on hardware equipment of the Exchange.

In 2008, the main reason for the increase in the volume of data transferred over the NIX.CZ peering point was the increasing amount and popularity of multimedia content. Also, there was a significantly growing interest in cooperation from foreign companies. The NIX.CZ Association has strengthened its position as an important and reliable partner of communication companies.

The objective of NIX.CZ is to provide reliable hardware equipment for this data exchange, to remain neutral and ensure equal conditions for all its members and customers.

## Mission

The purpose of the NIX.CZ Association is to enable data flow exchange. This data exchange is voluntary between and among individual compa-

### Registered Office and Contact Details

The current location of the registered office enables fast access to all inter-connection points of the Association.

### The registered office and contacts details in 2008 were as follows:

#### Address:

Vinohradská 184/2396  
130 52 Praha 3

Registration No:	65990471
Tax reg. No:	CZ65990471
Phone:	+420 272 660 628
Fax:	+420 272 660 629
e-mail:	info@nix.cz
URL:	<a href="http://www.nix.cz">http://www.nix.cz</a>

### In 2008 the Association operated inter-connection points at the following locations:

NIX1  
České Radiokomunikace  
Mahlerovy sady 1  
Praha 3

NIX2  
GTS Telehouse  
Vinohradská 190  
Praha 3

NIX3  
T-Systems Czech republic  
5.května 65  
Praha 4

NIX4  
SITEL Telehouse  
Nad Elektrárnou 411  
Praha 10

## Statement by the Chairman of the Board of Directors

Ladies and Gentlemen,

NIX.CZ Association has been operating the oldest and largest Internet Exchange in the Czech Republic. Available statistics suggest that it is a significant point on the map – it ranks among the first ten in Europe.

Association stability is an important factor not only for members and customers of the Association itself, but also for Internet users. Thanks to our professional team, which provided the services in an even better way in 2008 in comparison to previous years, we have achieved very good results in the area of outages. However, it is not only technical stability and failure-free operation that matters in terms of stability. It also involves financial independence and stability of the Association on the market. In a time of financial crisis it is necessary to get prepared for potentially worse days ahead – however, thanks to down-to-earth planning, NIX.CZ have ensured sufficient space and resources for such a case.

The development of NIX.CZ continues steadily and must not stop. Due to the fast growing traffic it is necessary to prepare a plan of employing new hardware able to deal with higher capacities. It is not always necessary to try to invent “a wheel” – that’s why I am in favour of the cooperation with our “competitors” – Internet Exchanges in other countries and our activities within the Euro-IX Association. The good news is that the conception of the Association has been prepared for as many as the following three years.

In conclusion, I would like to give thanks to Tomáš Maršálek and his team for their enthusiasm and mainly the achieved results. One of the unmistakable proofs of our success is the ever-growing number of connected networks and the “smooth” statistics chart of failure-free operation.

I wish you good luck in the days to come and I keep my fingers crossed for you.

On behalf of the Board of Directors of NIX.CZ  
**Mgr. Josef Chomyn**

### Statement by the Director of the Association

Ladies and Gentlemen,

the year 2008 continued in the trend of an increasing data traffic, failure-free and stable operation and financial results that were better than planned.

The overall data traffic exceeded 50Gb/s in Autumn 2008 and approached 80Gb/s at the close of the year. NIX.CZ maintained its position as one of the "TOP 10 European Exchanges".

PBT reached CZK 9 208 000 and will be used in the reserve funds of the Association as a buffer for any stagnation caused by the ongoing worldwide financial crisis and for any potential future investments in new technology.

A new service was introduced for members and customers of the Association – route servers for both the IPv4 and IPv6 traffic.

Concerning the internal organization of the Associa-

tion, the number of employees increased in the technical and administration area; the General Meeting in June 2008 elected a new member of the Supervisory Board and in December 2008 re-elected the current Board for the following 3 years. The long-term strategy of the Association was adopted by the members in June 2008.

Again, the technological platform of Cisco Catalyst 6500 proved to be sufficient concerning the capacity, and a new DWDM Cisco technology was introduced. Also, we started preparations for the selection of a new technology, the tender is planned to take place in 2009.

Like last year, I firmly believe the NIX.CZ Association will continue to develop at the same pace, its operation will remain stable as it has been so far and it will not be seriously affected by the worldwide economic crisis.

Director of NIX.CZ Association

**Ing. Tomáš Maršálek**

# STATUTORY BODIES IN 2008

## Board of Directors:

### The Board of Directors until 16.12.2008:

Name	Position	Term of office
Mgr. Josef Chomyn	Chairman of the Board of Directors	1.1.2008 – 16.12.2008
Milan Švácha	Member of the Board of Directors	1.1.2008 – 16.12.2008
Mgr. Ondřej Filip	Member of the Board of Directors	1.1.2008 – 16.12.2008

### On 16.12.2008 the General Meeting elected the following Board of Directors:

Name	Position	Term of office
Mgr. Josef Chomyn	Chairman of the Board of Directors	16.12.2008 – 31.12.2008
Milan Švácha	Vice-Chairman of the Board of Directors	16.12.2008 – 31.12.2008
Mgr. Ondřej Filip	Member of the Board of Directors	16.12.2008 – 31.12.2008

## Supervisory Board:

### Supervisory Board in 2008:

Name	Position	Term of office
Radek Majer	Chairman of the Supervisory Board	1.1.2008 – 31.12.2008
Mgr. Karel Taft	Member of the Supervisory Board	1.1.2008 – 31.12.2008
Ing. Michael Macek	Member of the Supervisory Board	1.1.2008 – 12.6.2008
Martin Semrád	Member of the Supervisory Board	12.6.2008 – 31.12.2008

# EMPLOYEES IN 2008

As of December 31, 2008 the Association employed five full-time employees in the positions of Director of the Association, three Technical Specialists and one Office Manager. The Association

also employed two part-time employees in the positions of Technician and Administrative Support.

The Director organizes and coordinates internal and external communication. Further, in cooperation with the Board of Directors, he prepares strategies and background materials for member's voting (on the Association's intranet), especially for the purposes of new members and customers admission, as well as principal changes in the organization of the NIX.CZ Association.

Technical Specialists look after technical, operatio-

nal and development matters.

Office Manager and Administrative Support focus on the operational and administrative matters of the Association.

Tereza Nikolaiová  
*Office Manager*

Kateřina Polívková  
*Administrative Support*

# OPERATION IN 2008

## Technical Solution

The total amount of aggregated data traffic transmitted by the interconnection points of the Association reached 70Gbps in December 2008, which represents 100% increase compared to the previous year.

In 2008, the chassis in NIX3 was replaced in order to increase the number of available slots for line cards. Also, the capacity of backbone interconnection between NIX1-NIX2-NIX4 was increased to 30Gbps and between NIX4 and NIX3 to 20Gbps. Due to a lack of dark fibres there is a passive DWDM system between NIX2 and NIX4 running over the existing fibres.

The following diagram shows the infrastructure as of the end of 2008:

The backbone platform continues to be formed by a series of CISCO 6500 switches in fully redundant configuration. All our nodes support Ethernet connections of capacities ranging from 100Mbps to 10Gbps; two or more physical lines joining into one logical line is supported from the speed of 1Gbps up. In 2008 we looked into the possibilities of using technologies by other producers due to the ever growing data traffic, increasing interest in 10Gbps connections and limited physical capacities of the current routes. The NIX.CZ interconnection technology continues to run on the link layer (Ethernet).

The Association runs its autonomous 6881 system on the platform of Cisco 7301 routers, which enables access to internal services of the Association and connection of hosted TLD DNS servers, both via the IPv4 and IPv6 protocols. The operation of the infrastructure is ensured by as many as 20 support servers installed at individual locations.

The Association continues to enable its members and customers to be interconnected using the IPv6 protocol. This connection is implemented within the same VLAN as IPv4; this fact enables the members and customers to operate routers and interfaces in a double protocol buffer mode. As of the end of 2008, 30 IPv6 networks have been interconnected, which represents 100% increase compared to the previous year when only 14 networks used the possibility to peer via the IPv6 protocol.

In September 2008 route-servers at NIX2 and NIX4 were put into operation after several months of testing. These route-servers simplify the system of peering sessions between members and customers, where there is no need of individual sessions.

These route-servers also simplify the process of new members and customers joining the Association. The service is provided free of charge to members and customers, peering is supported in both IPv4 and IPv6 protocols.

In October 2008, a new any-cast secondary domain server for .TLD and .PL was put into operation in the premise of NIX.CZ.

In 2008 the Association was further improving its own system of infrastructure monitoring, which is predominantly used for the diagnostics of interconnection problems and for the monitoring of operational discipline.

## Presentation

The presentation of the Association in 2008 was traditionally focused on the Czech as well as foreign professional communities, using the web pages and news releases as the main com-

munication channels serving this purpose.

In 2008 the Association continued to cooperate with other IXPs all around the world and actively participated in RIPE, NANOG and APRICOT conferences, the EIX-WG working group and the Euro-IX meeting. Thanks to this pro-active approach a lot of foreign companies joined the Association during 2008.

In June the Association in cooperation with the AMS-IX association was one of the exhibitors at the Capacity CEE 2008 conference that took place in Prague.

Like every year, the association held two social gatherings for the members in 2008. These meetings give competitors an exceptional opportunity to meet as partners and co-operators. Besides, the Association prepared a workshop on the new version of the IPv6 protocol.

# AUDITOR'S REPORT

## **Final Accounts Report**

The following is a report made on 20th May 2009 based on an audit of the financial statements. The report forms an integral part of this Annual Report and reads as follows:

"We have verified the enclosed financial statements of the NIX.CZ association, i.e. the balance sheet as of 31st December 2008, profit and loss statement for the period from 1st January 2008 to 31st December 2008 and a schedule to these financial statements including the description of all used significant accounting methods."

## **Responsibility of Statutory Body of Accounting Unit for Financial Statements**

According to Czech accounting regulations the preparation and correctness of the final accounts falls under the responsibility of the statutory body of the NIX.CZ Association. Within this responsibility, the statutory body is obliged to design, introduce and ensure the internal audit of the preparation and correctness of the financial statements in order to ensure it does not contain any substantial incorrect data caused by mistake or deceit, to choose and apply suitable accounting methods and to carry out accounting estimations corresponding to the current situation.

## **Auditor's Responsibility**

Our task is to make auditor's statement concerning the final accounts based on an audit we have carried

out. We have carried out the audit in compliance with the law on auditors and the International Auditing Standards and related application annexes by the Chambers of Auditors of the Czech Republic. Pursuant to these regulations we are obliged to observe ethical standards and to plan and carry out audits in such a way to become adequately and reasonably sure that the financial statements do not contain any significant inaccuracies.

The audit involves carrying out auditing procedures whose aim is to gain evidence on the amounts and transactions presented in the financial statements. The choice of the auditing procedures is at the auditor's discretion, including the assessment of the risk that the financial statements contain any significant inaccuracies caused by mistake or deceit. When evaluating this risk the auditor takes into account the internal audits which are relevant for the preparation and correctness of the final accounts. The target of the assessment of the internal audits is to propose and choose suitable auditing procedures, not to evaluate the efficiency of the internal audits. The audit also involves an assessment of the suitability of used accounting methods, the relevance of accounting estimations carried out by the management as well as the assessment of the overall presentation of the financial statements.

We consider the obtained evidence to be a sufficient and suitable background for making our statement.

### **Auditor's Statement**

"In our opinion, the financial statements show the true picture of assets, liabilities and financial situation of the NIC.CZ Association as of 31st December 2008 and the expenditures, revenues and financial results in 2008 in compliance with Czech accounting regulations."

## Report on the Annual Report

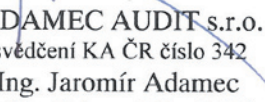

We have also verified the compliance of the Annual Report of the NIX.CZ Association as of 31st December 2008 with the final accounts which form an integral part of this Annual Report. The correctness of the Annual Report is the responsibility of the statutory body of the NIX,CZ Association. Our task is to make a statement on the compliance of the Annual Report with the final accounts, based on the verification we have carried out.

We have carried out the verification in compliance with the International Auditing Standards and related application annexes by the Chambers of Auditors of the Czech Republic. These standards require the auditor to plan and carry out the verification in such a way to become adequately and reasonably sure that the information contained in the Annual Report describing the facts that are presented in the financial accounts are in all significant aspects in compliance with the relevant financial statements. We are convinced that the verification we have carried out provides an adequate background for making an auditor's statement.

In our opinion, the information presented in the Annual Report of the NIC.CZ Association as of 31st December 2008 is in all significant aspects in compliance with the aforesaid financial statements.

In Liberec, on the day of 20th May 2009
